LARGEST COLLECTION IN THE WEST

OLD AND NEW

MODERN NOVELTIES

RECENT INTRODUCTIONS

IMPORTATIONS

### SIL-MAR GARDENS

SILVERTON, OREGON

MEMBER

*American Iris Society  
American Peony Society  
Willamette Valley Nursery Club  
Western Nut Growers Association  
Oregon State Horticultural Society*

### LOCATION

Sil-Mar Gardens is located 3 miles northeast of Silverton at the first four corners on the pavement known as the Cascade Highway leading to Molalla, Scotts Mills and other points.

### 3 FOR 2

In very many cases we will supply you with three roots for the price of two. When we are unable to do this we will refund money for second rhizome.

### AN IRIS FOR EVERY NAME

As a special premium offer to build up our mailing list we will give for each name of an iris lover, who grows at least twenty varieties of tall bearded iris in his or her garden, twenty-five cents worth of iris of your selection with your order equal to the amount of the premium, providing that they are not listed in the American Iris or Peony Society membership list or do not receive our catalog. We will gladly check over your list for you.

### OREGON GROWN

Oregon grown rhizomes from a temperate climate for both northern and southern plantings.

### NO BORERS

Our plantings do not harbor the iris borer. Oregon is singularly fortunate in that iris borers do not thrive or have not yet entered this state in our knowledge at the present writing. .

### NOT FORCED

Our iris roots have not been forced to yield large rhizomes or greater multiplication by irrigation or with fertilizers of any kind. Our well hardened rhizomes should thrive even when planted under unfavorable circumstances.

### A TIMELY WARNING

Never plant iris roots under the surface of the ground but "Like a duck on the water."

### LARGER RHIZOMES

Our entire planting has been reset last season and our roots should be larger and better than ever before.

### POSTAGE PAID

Postage paid on all orders amounting to \$2.50 or over. On all orders less than \$2.50 send 35 cents extra for postage and packing, east of the Missouri River; 25 cents extra in the west.

## DELIVERY

Iris will be dug and shipped in July, August and September. At other times only upon special request.

## TERMS

Cash with order.

## NO SUBSTITUTION

We do not substitute except on request. We shall return your money, if we are unable to supply your wants.

## ORDER EARLY

The demand for certain good and well advertised varieties may exhaust our supply rapidly.

## MONEY REFUNDED

If roots are unsatisfactory upon arrival, please return. Roots are guaranteed true to name and satisfactory adjustment will be made if they prove untrue.

## WHOLESALE

Write us for special quotations for iris in hundred lots.

## RATINGS

The 1927 ratings of the American Iris Society are given where available. The exhibition rating is given first, garden rating next. One number only is the 1922 garden and exhibition rating. The year signifies that such varieties have not yet been rated and are usually scarce, not well distributed or recently introduced, having been introduced in the year given.

### Rating Guide

95	almost perfect
90	very fine
85	fine
80	very good
70	good
60	fair
50	poor

## RANUNCULUS

Ranunculus are a buttercup like flower in a variety of colors. They are not hardy and must be dug and handled similar to gladiolus. In the west a mulch of straw or peat will generally bring them through the winter. Plant about 2 inches deep. Mixed colors ..... doz. 30c

## ANEMONES

Anemone coronaria De Caen or poppy-flowered anemone is a beautiful blubous plant with a wide range of color.

Mixed colors ..... doz. 30c

## DWARF IRIS

Dwarf iris make excellent subjects for the rock garden and borders. We highly recommend Cyanea a fine dark purple, and Orange Queen, an excellent yellow. We have a fine supply of these and will gladly quote prices for large lots.

## Order Books from us

**HORTUS**, by L. H. and E. Z. Bailey. A real dictionary of plants with an immense amount of reliable information about every ornamental, fruit and vegetable cultivated in North America, arranged alphabetically with common names cross-referenced. Gives comprehensive information on culture, growing habit, hardiness, uses, soil requirements, transplanting, propagation, native habitat, and the range of cultivation of each plant with illustrated articles on different types of horticulture and cultural methods. 652 pages, 35 illustrations, fabrikoid, \$10.00.

**THE BOOK OF BULBS**—see page 23. A book every bulb grower should have.

**IRISES**—see page 23. Learn more about your hobby.

### NOTE

We do not fertilize or irrigate our plants in any way. Being of hardy substance they should do well under the most varied conditions of climate and culture. We aim to send out normal, average, good blooming size roots that will give a good percentage of bloom with proper care.

# JOIN THE AMERICAN IRIS SOCIETY

\$3.00 A YEAR

Four Bulletins each year. Checks payable to the American Iris Society should be sent to the

SCIENCE PRESS PRINTING CO.,

Lancaster, Pa.

## IRIS CULTURE

---

The prime requisites for bearded Iris are good drainage and sunshine. For best results they should not be planted on northern exposures, under shade trees or overhanging shrubs among dense bedding plants or grass, near eaves or other places where water is apt to collect.

If drainage is not good, raised beds should be prepared. All undecomposed or commercial fertilizers should be avoided. Lime or wood ashes are beneficial, especially on acid soil.

Plant the Iris like a duck on the water, with the top of the rhizome or enlarged root and foliage on top of the ground and exposed to full sun and the rootlets well-firmed in the ground.

Water every two weeks until established, after which no irrigation is usually necessary. Replant and thin every three or four years. Do not spade or cultivate deeply, as this destroys many of the feeder roots.

We shall be glad to advise in any further problems.

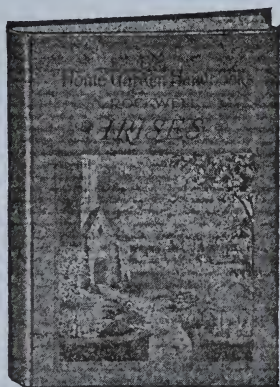

Yours for better Irises,

SIL-MAR IRIS GARDEN.

**THE BOOK OF BULBS**, by F. F. Rockwell. Will help you grow bulbs successfully for spring, summer, fall, and winter flowering, inside and outside your home. The information in this book tells, and its pictures show how to grow 70 different bulbous plants including tulips, daffodils, hyacinths, lilies, gladiolus, dahlias, peonies, irises, begonias, cannas, bloodroots, and dozens of others. Recommended as the most complete and newest guide to bulb growing. 187 illustrations, 264 pages.

**\$3.00**

**IRISES**, by F. F. Rockwell. A handy guide which will bring you success with irises and show new uses and effects possible in your garden. Describes the dwarf, early, German, Japanese, Siberian, water, crested, Spanish, English, Dutch and other types; tells the best soils; what fertilizers to use; how to plant; and what care is necessary. Tells how to propagate stock for your own use. 54 illustrations, 80 pages.

**\$1.00**

## *I r i s*

The "Goodness of the Rainbow" means,  
I bring a message true;  
From Winter, Spring to Summertime  
I've pushed my blossoms through.  
How thrilling in the dewy morn  
So see what overnight—  
Has taken place in your front yard,  
Most wonderful the sight.  
How marvelous the color scheme,  
Past artist's brush to wield,  
Its many tinted shades and lines  
The rainbow seems to yield.  
In color-mass and single bloom,  
In tracery and form;  
In queenly grace she stands alone,  
Her equal yet unborn.  
The Cherry Blossom for Japan,  
While England has the Rose;  
And Holland has her Tulip beds,  
Yet everybody knows—  
That Iris is from every clime,  
The old world and the new:  
Historic graves her colors bear  
Caught from the sky of blue.  
It was of her the Saviour said  
(Her beauties He portrayed),  
"That Solomon in royal dress  
Was not like these arrayed."  
And standing with inviting air  
To stranger and to friend;  
The longer known, the more beloved,  
Her qualities attend.

—Mrs. W. W. Brown, Sioux City.
